**PHASE 1**

Will include outdoor visits with people who are able to understand and comply with social distancing, with or without staff supports.

**ARRIVING AT THE RESIDENCE**

- Visitors should ring the doorbell and will receive a health screening at the doorway. The residence staff will take the visitor’s temperature and complete the required COVID-19 screening questions. Visitor health screening information will be documented in the log used to record the necessary information for staff.

- If a visitor has a fever or answers “yes” to any of the screening questions, he or she will be permitted to continue the visit and will be asked to leave the residence. The visitor will not be able to be reconsidered for visitation until he or she is symptom free for at least 72 hours.

- If a family member or advocate has a pre-existing condition that results in a COVID-like symptom (e.g., consistent cough, sneezing, or sore throat from seasonal allergies), he or she is encouraged to visit a medical provider to obtain a note to indicate he or she is not experiencing symptoms related to COVID-19.

- After the visitor has successfully completed the health screening, he or she will be asked to wash their hands and properly dispose of his or her mask and gloves.

- Visitors will be limited to one hourly visit per week to ensure that all families have an opportunity to visit each week. Families may request additional time if the schedule is not filled.

**DURING THE VISIT**

- Social distancing of at least 6 feet will be observed throughout the visit. Unfortunately, kissing, hugging, or other physical contact between loved ones is not allowed at this time.

- Visitors will be asked to apply hand sanitizer at the beginning of the visit.

- Food or beverages cannot be consumed during the visit, as eating and drinking require removal of face masks.

- At the end of the visit, the person supported is required to apply hand sanitizer before re-entering the residence. Upon reentry to the residence the person supported will be encouraged to thoroughly wash their hands and properly dispose of his or her mask and gloves.

- Staff are required to clean and sanitize the meeting area for each visit.

**PHASE 2**

Will include visitations inside homes for people supported who are able to understand with social distancing, with or without staff supports.

**ARRIVING AT THE RESIDENCE**

- Visitors should ring the doorbell and will receive a health screening at the doorway. The residence staff will take the visitor’s temperature and complete the required COVID-19 screening questions. Visitor health screening information will be documented in the log used to record the necessary information for staff.

- If a visitor has a fever or answers “yes” to any of the screening questions, he or she will not be permitted to continue the visit. The visitor will be asked to leave the residence. The visitor will not be able to be reconsidered for visitation until he or she is symptom free for at least 72 hours.

- If a family member or advocate has a pre-existing condition that results in a COVID-like symptom (e.g., consistent cough, sneezing, or sore throat from seasonal allergies), he or she is encouraged to visit a medical provider to obtain a note to indicate he or she is not experiencing symptoms related to COVID-19.

- After the visitor has successfully completed the health screening, he or she will be asked to wash outside until residence staff can bring the family member outside. All visits during Phase 1 will take place outside the residence in green space, yards, or on porches or decks.

**DURING THE VISIT**

- Visitors will be limited to one hourly visit per week to ensure that all families have an opportunity to visit each week. Families may request additional time if the schedule is not filled.

- Social distancing of at least 6 feet will be observed throughout the visit. Unfortunately, kissing, hugging, or other physical contact between loved ones is not allowed at this time.

- Visitors will be asked to apply hand sanitizer at the beginning of the visit.

- Food or beverages cannot be consumed during the visit, as eating and drinking require removal of face masks.

- At the end of the visit, the person supported is required to apply hand sanitizer before re-entering the residence. Upon reentry to the residence the person supported will be encouraged to thoroughly wash their hands and properly dispose of his or her mask and gloves.

- Staff are required to clean and sanitize the meeting area for each visit.
